**5. Highways Issues**

- (i) Pedestrian Crossing A153 – No Progress

**6. Planting of trees Pumping Station update –** Cllr. M Head and the Clerk met with Paul Waite from Anwick Garden Centre and chose what trees and shrubs would be suitable for the area. Help was asked with the planting and watering. Two residents very kindly offered to assist with the work, Paul also very kindly offered to provide bulbs later in the year for colour in the spring.

**7. Properties River Lane Anwick update –** The Clerk had received a response from NKDC and to date no decision had been made as to whether two properties might be converted into one property. NKDC had cleared the rubbish around the property and the hedge will be cut prior to new tenants moving in.

**8. Sewage pollution River Slea update –** Cllr. M Head, Jayne Bond and Julie Samuels met with plant managers from Moy Park and discussion took place around the waste from the chickens. The phosphate levels are monitored in and out and have problems with the volume of fat produced. Outflow from the Sewage Treatment Works goes into the dyke over various areas then into the River Witham. The water quality is good but that depends on the amount of waste from Moy Park. The quality of the water is moderate/poor which supports fish etc. The Clerk to contact Anglian Water to request attendance and talk about the water treatment to one of our meetings.
